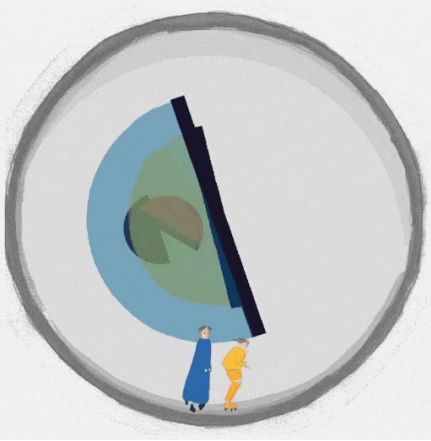
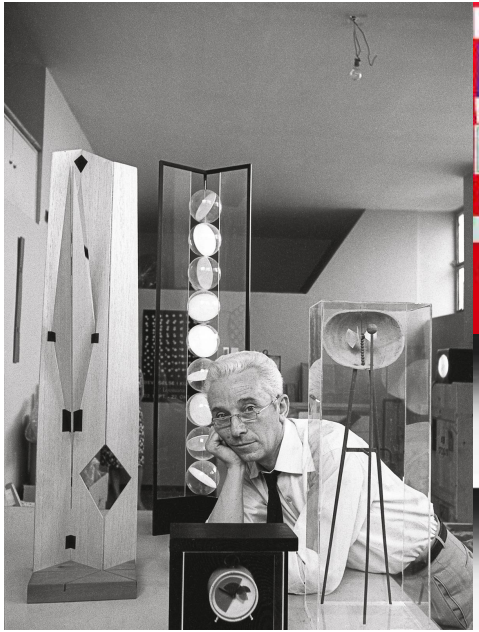
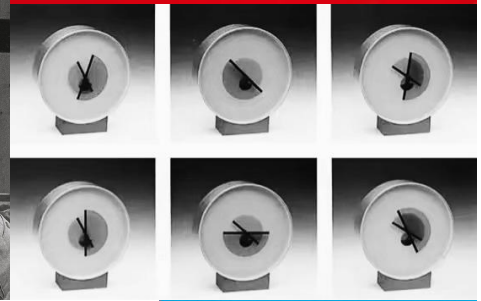
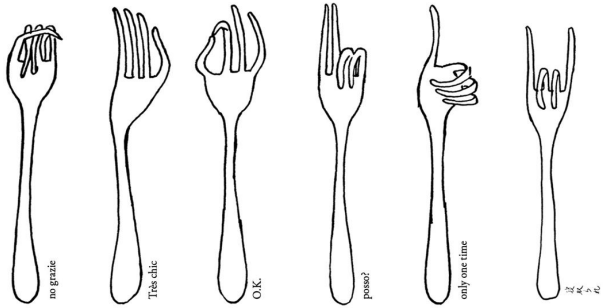
Bruno Munari revolutionized children's book design, pioneering interactive picture books.
"Design should not be a slave to function but a poetic expression of art."





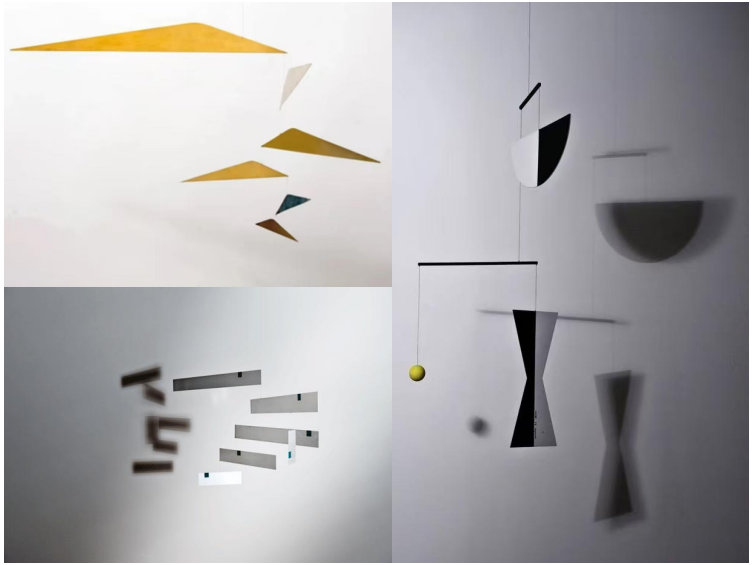




Fact

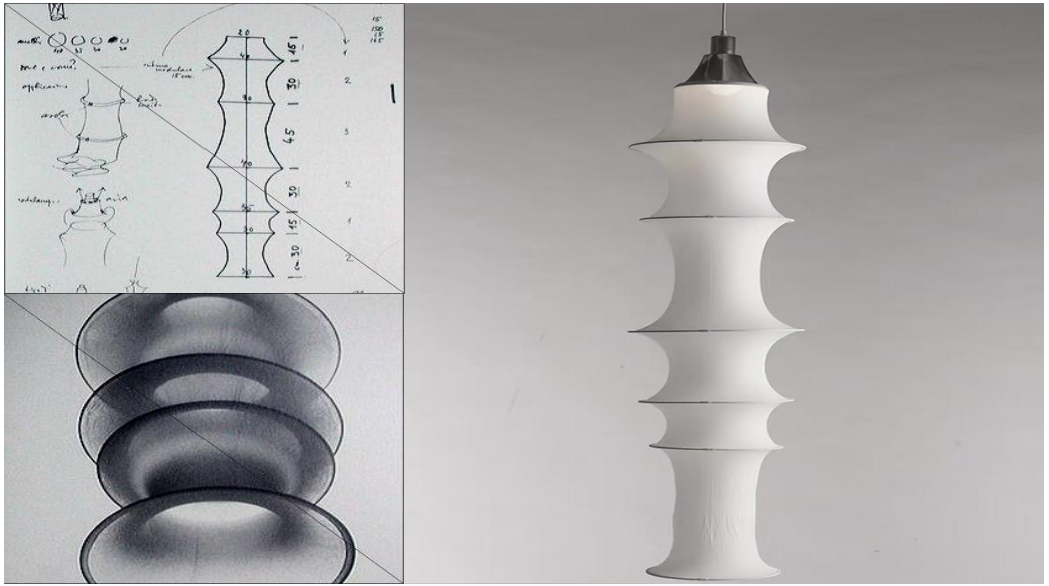
Design principles and artistic creation share the same underlying logic.

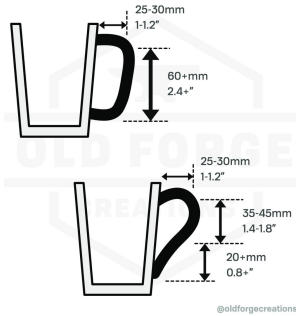
The essence of design is art,
awakening people's perception of life.

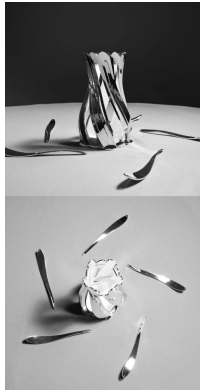


Fact 2 Everyday objects can be imbued with design value through re-examination.

The best design isn’t lofty, it hides in details that make life more joyful and comfortable.







Fact 3 Cultural symbols can be translated into new design languages through modern reinterpretation.

Designs combine traditional art with modern design,
achieve a dialogue of cultural symbols across time and space.
